

Netarus

Rapidly Deployable Wireless Camera (RDWC) Virtual PTZ & IP Network

OVERVIEW

The wireless or cellular network enabled Rapidly Deployable Wireless Camera (RDWC) from Netarus is a completely stand-alone weatherproof camera. The RDWC is equipped with a high resolution day/night camera, featuring a mobile accessible interface from any Apple, Windows, Android or Blackberry device. With an IP65 weatherproof rating, the RDWC's camera is made of a rugged ABS plastic to provide increased protection against accidental impact. It also comes with an sunshield to reduce glare and contact with the elements.

Equipped with a wireless transmitter and convenient carrying handle, the RDWC can be deployed within seconds to aid in navigation or transportation. Cost effective and purpose built to withstand the harshest environments, the RDWC offers several advanced features. The digital pan-tilt-zoom (PTZ) capability allows the camera to be adjusted via the touch screen interface to achieve the exact field of view you need. This unit comes with a 1-year warranty.
