

OVERVIEW OF RDVS2150

The Rapidly Deployable Video Surveillance (RDVS) platform is a centralized video monitoring solution to integrate multiple video and audio feeds quickly into a weatherproof case.

Equipped with encrypted audio and video receivers, SD-card (solid state) based DVR, integrated display and wireless access point, the RDVS is designed to be quickly deployed in any vehicle or vessel.

Added to this, comprehensive features including hot swap hard drive, 3-axis g-sensor, GPS interface, 802.11b/g WiFi, and remotely accessible interfaces via Blackberry, Android and Apple (iPad/iPhone) phones and tablets.

Each RDVS comes with a 1-year warranty.
