TugCam™ – See Blind Spots In Complete Darkness – TC100 Series

TugCam™ (www.tugcam.com) from Netarus, LLC is a rugged and self-contained rapidly deployable camera system platform. TugCam significantly improves the situational awareness of any tugboat, towboat or large vessel captain with its built-in wireless camera system. TugCam is built to operate in marine environments and contains high-powered wireless video transmitters, a rechargeable power source and comes equipped with a low-lux camera and IR illuminators. Optional add-on features include sensors, alarms, additional cameras and more. For more information, contact Netarus or authorized dealer.

Features

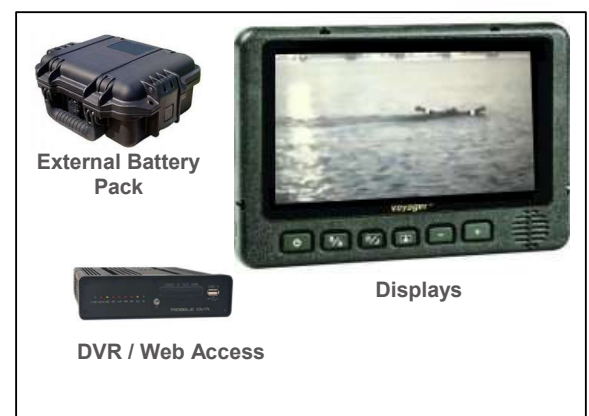

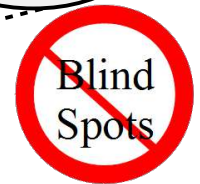

- See in complete darkness with infrared illuminators over 100yds / 300ft (football field).
- Eliminate blind spots by placing the camera up to 3000ft away from the wheelhouse.
- Four magnets on base and carrying handle for ease of mounting.
- Integrate into existing displays or AIS with available BNC or RCA adapter.
- Ultra portable measuring only 12" x 10" x 9.5" and weighing just 15lbs.
- Standard run-time between 8 and 10 hours (battery upgrades are available)
- One (1) year parts and labor warranty.*
